SUMMARY

Early-career cloud and platform engineering professional building toward a DevOps career, with hands-on experience across Linux, Git, Terraform, Docker, Kubernetes, AWS, Azure, monitoring, automation, and production support. Currently working in a production-facing engineering internship while developing practical DevOps projects focused on CI/CD, observability, and cloud infrastructure. AWS- and Azure-certified, with a strong interest in reliable software delivery, troubleshooting, and learning in real cloud-native environments.

EXPERIENCE

Studio Venturis · Cape Town, South Africa · Jun 2026 – Present

Full Stack Engineer Intern

- Support production and development applications serving thousands of monthly active users, troubleshooting software, integration, and infrastructure-related issues.
- Contribute across TypeScript/NestJS, PostgreSQL, C#/NET, AWS SQS, and Azure Service Bus services, building practical understanding of distributed systems and cloud-hosted applications.
- Support Git and GitHub-based deployment workflows, release verification, technical documentation, and issue follow-through with developers and stakeholders.
- Assist with operational requirements tied to application availability, reliability, scalability, and deployment readiness.

PROJECTS

AWS Cloud Resume Challenge

AWS, S3, CloudFront, GitHub Actions, OIDC

- Built and deployed a cloud-hosted portfolio; automated deployments to S3 and CloudFront through GitHub Actions and configured OpenID Connect (OIDC) role assumption to avoid long-lived CI/CD credentials.

DevSecOps Landing Zone Factory

Terraform, AWS, Azure, GitHub Actions, OPA, Checkov

- Built reusable Infrastructure as Code workflows with automated validation, security scanning, policy checks, and cost analysis; applied secure authentication and least-privilege principles.

GitOps Progressive Delivery Platform

Kubernetes, Helm, Argo CD, Flux

- Built declarative container deployment workflows using Kubernetes and Helm, with GitOps-based synchronization and CI validation for repeatable application delivery.

SLO Sentinel

OpenTelemetry, Prometheus, Grafana, CloudWatch, Azure Monitor

- Implemented monitoring and observability workflows using logs, metrics, traces, dashboards, and service-level objectives to improve visibility and troubleshooting.

SKILLS

Linux, Git, GitHub, GitHub Actions, CI/CD, Terraform, Infrastructure as Code, Docker, Kubernetes, Helm, Argo CD, Flux, AWS, Microsoft Azure, OCI, Amazon Elastic Container Service (ECS), Amazon Elastic Kubernetes Service (EKS), S3, CloudFront, CloudWatch, Azure Monitor, Azure Service Bus, App Service, Python, Bash, PowerShell, TypeScript, Node.js, NestJS, C#/NET, SQL, REST APIs, Prometheus, Grafana, OpenTelemetry, OpenID Connect (OIDC), OPA, Checkov, policy-as-code, least privilege, deployment troubleshooting

EDUCATION

North-West University · 2022 – 2025

Information Technology Studies

- Software development, databases, networking, systems design, and cloud infrastructure.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (2026), Microsoft Certified: Azure Administrator Associate (AZ-104) (2026), AWS Certified Cloud Practitioner (2026), Microsoft Azure Fundamentals (AZ-900) (2025), OCI Foundations Associate (2025)
